PROJECT DESCRIPTION

Immersive water installation for MU with five linked membranes (WELL, WHIRL, WATERFALL, WAKE, WOMB), pumps, sensors, thermodynamics and sound-activated control. This quote concerns only the design phase: a paid step that de-risks the project before any construction obligations.

TEAL's role

TEAL provides the technical design and a reliable budget on which go/no-go decisions can be made.

SCOPE & TIMELINE

Design phase: 3D-design, BOM & budget

Paid de-risk phase. 3D design with approximate dimensions of the five membranes, a BOM, and a verified-price budget with contingency. Includes 1 revision session.

Effort: 4 weeks, incl. 1 revision
